1. A 20 -foot ladder is placed against a vertical wall of a building, with the bottom of the ladder standing on level ground 16 feet from the base of the building. How high up the wall does the ladder reach?

The ladder reaches $\square$ feet up the wall.
(Simplify your answer. Type an integer or a fraction.)
2. Use the given conditions to write an equation for the line in point-slope form and slope-intercept form.

$$
\text { Slope }=-9, \text { passing through }(-3,-5)
$$

Type the point-slope form of the line.

(Simplify your answer. Use integers or fractions for any numbers in the equation.)
Type the slope-intercept form of the line.

(Simplify your answer. Use integers or fractions for any numbers in the equation.)

What is the length of a side of the square piece of sheet metal?
$\square$ feet
4. Simplify.
$\left(\frac{4}{5}\right)^{-3}$
$\left(\frac{4}{5}\right)^{-3}=\square$
(Simplify your answer. Type a fraction or mixed number.)

5. Diana has available 2800 yards of fencing and wishes to enclose a rectangular area.
(a) Express the area A of the rectangle as a function of the width W of the rectangle.
(b) For what value of W is the area largest?
(c) What is the maximum area?

(a) Express the area as a function of the width.
$\mathrm{A}(\mathrm{W})=\square$
(b) For what value of W is the area largest?
$\mathrm{W}=\square$ yards (Simplify your answer.)
(c) What is the maximum area?
$A=\square$ square yards (Simplify your answer.)
6. Simplify.
$\sqrt[3]{-27}$

Select the correct choice below and, if necessary, fill in the answer box within your choice.A. $\sqrt[3]{-27}=$
B. The root is not a real number.
7. Evaluate the expression.
$-2^{-1}+3^{-2}$
$-2^{-1}+3^{-2}=\square$
(Simplify your answer. Type a fraction.)

8. Multiply.
$(3+\sqrt{3})^{2}=\square$
$(3+\sqrt{3})^{2}$
(Simplify your answer. Type an exact answer, using radicals as needed.)
9. Find the slope of the line containing the following two points: $\left(\frac{7}{10},-1\right)$ and $\left(-\frac{1}{5},-\frac{1}{5}\right)$.

Select the correct choice below and, if necessary, fill in the answer box to complete your choice.
A. The slope is $\square$. (Type an integer or a simplified fraction.)B. The slope is undefined.
10. Rewrite the given equation in slope-intercept form and then graph the line.

$$
9 x+4 y-36=0
$$

What is the equation in slope-intercept form?

(Use integers or simplified fractions for any numbers in the equation.)

Use the slope and the $y$-intercept to graph the line.

$$
\rightarrow \underset{\text { Delete }}{+\cdots(\text { Clear })}
$$
