Spotlights on Teaching and Service

Elizabeth Theta Brown, Edwin O'Shea and James Sochacki
James Madison University

Abstract: This seminar will be a collection of three 15 minute talks in the style of the MAA sectional meetings. Elizabeth Brown will discuss hers and Corrine Diop’s Art Mathematics course that is sponsored by the Institute for Visual Studies and which is running for the third time this semester. Edwin O’Shea, inspired by his colleagues’ use of a daily quiz in their calculus class, will reflect on his own experiences with implementing such a regime. Jim Sochacki will report on a long standing practice of his, that of assigning an entry test on number systems and why he uses it in all his introductory lower level classes and in his intermediate level courses for future teachers.
