

Wolfram technology cross-discipline seminars at JMU

Wolfram Technologies for Teaching and Research

Andrew Dorsett, Wolfram Technologies

Abstract: This brief seminar will highlight new features in Mathematica 10, ways for brand-new users to begin with Mathematica, ready-to-use applications for the classroom (in both Mathematica and Wolfram—Alpha Pro), as well as research tools already available with your site license. An electronic copy of the seminar notebook will be sent to all attendees for further use and development.
