

Department of Mathematics and Statistics Colloquium

Bibliophilia! Summer reading send-off!

Moderator: Elizabeth Theta Brown, JMU

Abstract: Summer is around the corner and with it, time to read and think beyond courses and immediate projects. Faculty from the four subject areas will give a brief overview of their summer reading picks, followed by time to browse and discuss.

Selection criteria are: that the book be of broad interest across the department, that the recommender is excited about it, and that it not require the reader to have the same graduate coursework as the recommender.

Volumes will be on hand for browsing.

Monday, March 30 at 3:45 in Roop 103
