

It's Elementary:

After students have been introduced to the **LEGO Base Set Parts (Parts are also called elements)** use this activity to check of understanding.

DIRECTIONS:

1. Count the number of teams in room - (use that many matching puzzles cards)
2. Hand out a puzzle card to everyone in the room
3. Participants will find puzzle card partner to make a team
4. Each puzzle team will need 1 LEGO Base Set
5. Puzzle team partners will find together, all parts listed on both puzzle cards
6. Place LEGO parts on lid of Base Set in the order found on the puzzle cards
7. When puzzle teams finish, they raise a hand to signal completion
8. Instructor will check for completion
9. Team partners will verbally name all found parts.

Good Job!

10. Instructor picks up the puzzle cards
11. Partners place all LEGO parts back in correct location.
12. This continues until all teams are finished and all cards are collected
13. If time a small reflection is good after this activity.

**It is a good icebreaker, vocabulary practice, short team activity...
This is just 1 way to use the puzzle pieces.*
