

Homework Instructions

- This is the cover sheet for your homework packet. Please print your name clearly at the top of the page. Staple each section of homework separately and leave each Problem 0 on a separate page of its own. Attach this cover page, then all Problem 0 pages, and then all stapled homework sections, in that order, with a binder clip.
- Homework for the chapter is collected all at once the day after the exam. Handing in homework is optional. No late homework packets will be accepted, but I will accept them early. Completed homework packets can raise D/F test grades by up to one letter grade.
- Problem 0 should be one page of your own summary of the material, and is considered part of each homework assignment. For maximum benefit you might consider doing Problem 0 *before* the class lecture. See handout for an example of an acceptable Problem 0.
- Problems Day is not an optional class day. Come to class prepared to work on homework problems in groups at the blackboard.
