

ANONYMOUS BOOK USAGE SURVEY

Math 232, Fall 2011

I am interested in how people use their calculus books throughout the semester. For example, I am curious about questions such as: Did you read the book before class? After class? Neither? Was the book easy or difficult to read? Did you attempt the exercises before or after the reading? What types of problems (Back/Concepts/Skills/Apps/Proofs/Forward) did you tend to work on? Which types did you never work on? Those are just examples so you don't have to answer any of those. Please just tell me how you used (or didn't use) the book on a daily/weekly basis in this course.
