

235 Group Worksheet**Name****Section**

September 16–17, 2010

_____	_____
_____	_____
_____	_____
_____	_____

Work in groups but do NOT split up problems. You must discuss each problem as a group and agree on a final answer. You may meet with your groups during the usual Thursday and Friday class periods, or at any time of your choosing. Hand in one worksheet per group.

You may use any resource you like when computing this assignment, as long as the work is done by the group as a whole. There may be an individual quiz on Monday, so make sure to write your own notes in your Notebook.

All problems are from the Section 1.2 homework. Put your final answers here, and show your work clearly and in order:

58.**62.****64.**

More problems here, yay!
