

Technique: _____ (continued)

Subcase: _____

How to recognize when this subcase applies, strategies for applying the technique to this subcase:

Examples where subcase applies (solve and check on separate paper!!). Try to choose as many different kinds of examples as you can; examples involving different kinds of functions, examples that look different, and examples where the subcase applies differently. Be sure to chose some easy or “classic” examples and some difficult examples:

-
-
-
-

Examples where subcase seems to apply, but does not (and why not). Alternatively, examples where the subcase applies but it is easier to do it another way:

-
-

Things to be careful of when using this subcase of the technique, identities that you have to know to use this subcase, strategies for identifying when this subcase applies, *et cetera*:
