

Department of Mathematics and Statistics Colloquium

*Potatoes, Potatoes and More Potatoes – What I did
on my Educational Leave in Idaho*

Jim Sochacki

James Madison University

Abstract:

I will show you where I worked in Idaho, where I lived in Idaho and some of the places I visited in Idaho. I will also show you several of the projects I worked on at the Idaho National Laboratory of the Department of Energy and discuss the mathematics and computing involved in these projects. There will be pictures and videos, but no popcorn, maybe fries.

Speaker Bio:

Prof. Jim Sochacki is a Professor in the Department of Mathematics and Statistics at James Madison University. His research focuses on initial value ordinary differential equations, numerical solutions, applied mathematics.
